SUMMARY

Full Stack Developer skilled in React.js, JavaScript, and Python, with expertise in creating responsive user interfaces, API integration, and state management. Proficient in CSS and Bootstrap for modern web design. Completed 8 months of Full Stack Development training and gained one year of BPO voice process experience at HRH Coimbatore, showcasing strong communication and problem-solving skills. .

TECHNICAL SKILLS

Programming Languages: Python, JavaScript , HTML, CSS

Libraries and Frameworks: React.js, Django, Bootstrap, React.Bootstrap

Database Management : MySQL, PostgreSQL

Tools: Git , GitHub

PROJECTS

Movie Finder App

frontend Project

July 2024 – Present

React, Bootstrap, TMDb API

Developed an interactive and responsive Movie Finder application that allows users to explore movies across various categories such as top-rated, popular, and upcoming. Integrated The Movie Database (TMDb) API to dynamically fetch and display real-time movie details, including posters, descriptions, and search functionality. Leveraged React's component-based architecture for building a dynamic user interface and Bootstrap for a polished, mobile-friendly design.

- **Search Functionality:** Implemented a robust search feature to allow users to find movies based on keywords.
- **Real-time API Integration:** Utilized TMDb API to fetch and render live movie data.
- **Dynamic Movie Categories:** Displayed movies sorted by categories like "Top Rated," "Popular," and "Upcoming."
- **Responsive Design:** Ensured a seamless user experience across all devices using Bootstrap.

E-Commerce Platform

Full-Stack Project

nov 2024 – Dec 2024

Python, Django,HTML,REACT JS

Developed a comprehensive and user-friendly e-commerce platform leveraging Django for backend operations and MySQL for efficient data storage. Designed to provide a seamless shopping experience, the application incorporates robust functionalities for user authentication, product management, and enhanced shopping features.

- Implemented user authentication with login and registration features, enabling secure user access.
- Designed a product management system allowing only administrators to add, edit, delete, and categorize products.
- Integrated an "Add to Cart" feature for users to manage selected items for purchase.
- Enabled a "Favorites" functionality, allowing users to save and view their preferred products.
