Skills & language

- JAVASCRIPT
- HTML
- CSS
- PYTHON

Frameworks

- BOOTSTRAP
- DJANGO

Library

- REACT

Version Control Tool

- Git&Github

Technical Skills

- REST API
- TROUBLESHOOTING
- DATA STORAGE

EDUCATION

2019 - 2022

vidhya sagar college

Bachelor of Science in Information
Technology (B.Sc. IT) WITH 68%

2017 - 2018

sri vengada krishna School

Higher Secondary Level Schooling
(HSC)

2015 - 2016

sri vengada krishna School

Secondary Level Schooling
(SSLC)

SUMMARY

As an enthusiastic and evolving full-stack Developer, I am actively seeking opportunities to contribute my skills and creativity to a collaborative development team. I have a solid foundation in REACT.JS , JAVASCRIPT and PYTHON I am particularly interested in joining a team where I can leverage my current project experience to craft intuitive and visually appealing user interfaces while continuously expanding my skill set in the field of full-stack development.

PROJECT

- Developed a functional calculator app using React with state management for user inputs and operations. It includes keyboard support for seamless calculations and robust error handling. The responsive design ensures a smooth user experience across devices.
- Developed a train reservation system in Python that manages seat bookings, cancellations, and a waiting list. Implemented validation for boarding and destination stations, ensuring logical travel routes. The system provides a user-friendly interface for passengers to manage reservations efficiently.
- This weather app lets users search for current conditions by city name, displaying temperature, humidity, and wind speed. It fetches data from the OpenWeatherMap API and features an intuitive interface. Enjoy real-time weather updates at your fingertips!

PROTFOLIO

My portfolio reflects my identity and highlights all of my projects, making it easy for you to explore them.

I learned to manage REACT components and implement functionality using JAVASCRIPT, deepening my knowledge of state management and hooks. This process helped me establish a strong foundation in REACT, I also used the router for smooth navigation.

I utilized TAILWIND CSS for styling my portfolio to improve my CSS skills and establish a solid foundation in this area, along with adding a feature for sending messages.

I made sure the portfolio is fully responsive, which helped me develop the skills needed to create an engaging and adaptable user experience.
